Municipal Infrastructure Gap

Madam Speaker, my question is for the Minister of Municipal and Community Affairs. Everyone has acknowledged that there is a municipal infrastructure gap, however, the most recent numbers on the size of that gap, that are publicly available, are from 2014. My question is, can the Minister provide an updated analysis of the municipal infrastructure gap, and the year in which it was completed:

1. What the current municipal infrastructure gap is by community;
2. What the current municipal infrastructure gap is by community as it relates to operations and maintenance funding;
3. What the current municipal infrastructure gap is by community as it applies to water and sewer funding, or as it is now called, environmental funding; and
4. What the current municipal infrastructure gap is by community as it applies to capital funding, or as it is now called CPI and Gas Tax?
