COVID-19 Spending Impacts

My questions are for the Minister of Finance:

1. What has been the impact of COVID-19 spending to date, including the number of dollars that have directly contributed to our Gross Domestic Product;
2. the number of businesses saved;
3. the number of jobs saved and/or recovered;
4. the projected impact of new or proposed spending; and
5. how many businesses and jobs were lost in the Northwest Territories as a result of COVID-19?
