**Frank Channel Bridge Replacement**

Mr. Speaker, my question is for the Minister responsible for Infrastructure. The Frank Channel Bridge is a critical piece of infrastructure for the Northwest Territories, providing access to the Tłı̄ch̄ communities, Yellowknife, and the mines in the Slave Geological Province region.

1. Can the Minister provide a detailed breakdown of the additional costs identified for the Frank Channel Bridge Replacement Project?
2. Can the Minister provide a detailed breakdown of funding already committed or budgeted by the GNWT, and or committed/budgeted by the Federal Government?
3. Can the Minister provide a copy of the last structural assessment completed on the Frank Channel Bridge?
4. Can the Minister provide a detailed contingency plan for continued operation and maintenance of the Frank Channel Bridge if construction of the replacement is delayed?
