Subject: Robert - Checking in on Carbon Pricing in NWT

Hello Robert,

I am just returning from vacation and catching up on a number of files, one of which is carbon pricing in the NWT.

We trust that all is on track to have the pricing system in place for September 1st as previously indicated. As you know, we provided the extension to September 1st to provide flexibility for your government's decision making process.

However, we can not provide any further extensions. All other jurisdictions have pricing in place and it is only fair that NWT follow through on its commitment. Failure to complete the process will require us to put in place the Federal backstop starting on September 1st, as we have done in a number of provinces. Our preference remains for NWT to put in place its system so it has full control over the revenue.

Please do let me know when you have an update.

Best,
Marlo
